Application/Control Number: 10/681,175

Art Unit: 2859

## Election/Restrictions

1. Applicant has already canceled **Claim 11** in the response filed 10 May 2005.

2. Claims 11-12 were previously withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected election, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 27 August 2004.

3. Newly submitted **claims 13-15** are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claims 13-15 are drawn to the non-elected invention of Group II, a method for measuring the response of a material or device to fire. The method claims are distinct from the apparatus of Claims 1 and 10 for the reasons stated in the Office Action mailed 28 July 2004.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits.

Accordingly, **claims 12-15** are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

## **EXAMINER'S AMENDMENT**

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Examiner made phone calls to attorney John P. Shannon in order to inform him of the status of the claims, but was unable to reach him on 07-09 June 2005.

Application/Control Number: 10/681,175 Page 3

Art Unit: 2859

5. The application has been amended as follows in order to cancel the non-elected

claims.

In the Claims:

6. This application is in condition for allowance except for the presence of claims

12-15, drawn to Group II, non-elected without traverse (in the Reply filed 27 August

2004).

Accordingly, Claims 12-15 have been cancelled.

7. Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Reasons for Allowance

8. The following is an examiner's statement of reasons for allowance:

Applicant's arguments (see REMARKS, filed 10 May 2005) with respect to

Claims 1, 2 and 10 have been fully considered and are persuasive in view of the

amendment. Applicant's argument regarding the coating being the same is not fully

persuasive on its own, since SMITH discloses a test specimen having a coating that

matches the emissivity of a process product. Moreover SMITH discloses or suggests

having an area that is the same as the process product.

Claims 1 and 10 are allowable because the prior art fails to teach or fairly

suggest a measuring device for determining the radiant heat flux absorbed by a test

Application/Control Number: 10/681,175 Page 4

Art Unit: 2859

specimen in a fire test apparatus, the specimen having an area exposed to radiant heating and being held in a specimen holder and coated with a coating to simulate the heat absorption of a material or object during a fire, wherein the measuring device comprises an electrical heating element (or an electrical heating means as claimed by Applicant in Claim 10) in heat transfer relationship with said body, free from interposition, between the heating element (means for heating) and said body, of the coating on said body, in combination with the other limitations of the respective claims.

The preamble of each of Claims 1 and 10 breathes life and meaning into the claims because the measuring device includes the same holder for the body as the holder in which the specimen is held in the fire test apparatus and the measuring device body includes the same coating as the coating on the test specimen in the fire test apparatus.

Claims 2-9 are allowable by virtue of their dependency upon Claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the form PTO-892 and not mentioned above disclose related heating simulation devices and methods. COTE et al. (U.S. Patent No. 6,568,846 B1 discloses a method of simulating heating damage on coated metal, quantifying the amount of energy absorbed calorimetrically.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stanley J. Pruchnic, Jr., whose telephone number is (571) 272-2248. The examiner can normally be reached on weekdays (Monday through Friday), the best hours being from 8:30 AM to 4:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego Gutierrez (Art Unit 2859) can be reached at (571) 272-2245. The Official FAX number for Technology Center 2800 is (703) 872-9306 for all official communications.

Any inquiry of a general nature or relating to the status of this application or proceeding may be directed to the official USPTO website at <a href="www.uspto.gov">www.uspto.gov</a> or you may call the USPTO Call Center at 800-786-9199 or 703-308-4357. The Technology Center 2800 Customer Service FAX phone number is (703) 872-9317.

The <u>cited U.S.</u> patents and patent application publications are available for download via the Office's PAIR. As an alternate source, <u>all U.S.</u> patents and patent application publications are available on the USPTO web site, from the Office of Public Records and from commercial sources.

Private PAIR provides external customers Internet-based access to patent application status and history information as well as the ability to view the scanned images of each customer's own application file folder(s).

For inquiries relating to Patent e-business products and service applications, you may call the *Patent Electronic Business Center (EBC)* at 703-305-3028 or toll free at 866-217-9197 between the hours of 6 a.m. and midnight Monday through Friday EST, or by e-mail at: <a href="mailto:ebc@uspto.gov">ebc@uspto.gov</a>. Additional information is available on the Patent EBC Web site at: <a href="http://www.uspto.gov/ebc/index.html">http://www.uspto.gov/ebc/index.html</a>.
